

## User Manual

Professional Styling Iron

GP225 Clinic

### Product Features

Glampalm styling irons use cutting edge technology combined with ergonomic and user-centric design.

Rated for 100-240 V, 50-60 Hz Input power 35 W

#### Nano-Vibration Smoothing

Plates resonate 8000 times per minute, reducing friction, frizz, and pulled hairs during styling.

#### CLINIC Mode

Set at 60 °C, this mode prevents heat damage while maximizing nutrient penetration and hair revitalization.

#### Healing Stone™ Infused Ceramic Coating

Healing Stone™, a precious mineral found deep in the mountains of Korea, provides incredible restorative qualities to produce smooth, shiny, and healthy-looking hair.

#### 3-D Ball Type Swivel System

New groundbreaking design allows 360° rotation around a swiveling base, completely eliminating the hassles of tangled and broken cords.

#### Quick Heating and Heat Recovery

The ceramic heaters and MICOM control system raise temperature swiftly and deliver consistent heat for ideal styling.

#### Cushioning and Tilting

Cushioned plates tilt to minimize pressure on hair and provide even heat distribution.

#### Dual Safety Features

- Bimetal sensing system prevents overheating.
- Sleep Mode - After an hour of inactivity, the iron enters sleep mode and emits warning beeps for 10 minutes.

#### Universal Voltage Compatibility

Can be used anywhere in the world.

\* Use Glampalm SILICONE COVER, which is included with the styling iron. This film can be used even at 200°C and prevents chemicals from seeping into heat plates, while emitting additional anions to increase shine and smoothness.

### Instructions

1. Press and hold the ON (HI) button for about 2 seconds. The iron will beep and the LED will start blinking. The default temperature is 150 °C.
2. Adjust heat between 110°C and 200 °C by pressing the temperature button up or down until the blue LED is positioned on the desired temperature. The LED blinks while heating up or cooling down, and turns solid once temperature stabilizes.
3. The vibration function is turned off by default. To turn on/off, press and hold the VIB button for about 2 seconds.
4. The GP225 Clinic also comes equipped with a CLINIC mode. To activate, lower the temperature until the LED is set to the CLINIC bar. This sets the temperature to 60 °C, which is ideal for various types of hair treatments. Combine with the vibration function for maximum effectiveness. Use the provided SILICONE COVER to protect the styling iron.
5. The Healing Stone™ infused ceramic coating allows you to straighten hair at lower temperatures compared to other irons, delivering superior results without damaging hair. We suggest starting at lower temperatures and slowly increasing heat until you see the results you want for your hair type.  
As a general guideline:
  - Damaged Hair – Less than 160 °C
  - Thin / Fine Hair – 160 °C ~ 180 °C
  - Normal Hair – 180 °C
  - Thick / Curly Hair – Above 180 °C
6. Before using the styling iron, ensure your hair is dry. Using a styling iron on wet hair can damage the hair cuticle.
7. Separating hair into sections allows easier styling. Pass through hair (we recommend a 2-inch wide section) starting near the scalp, at a steady, controlled pace. Glampalm's advanced technology usually requires just one pass to achieve styling results.
8. The iron goes into sleep mode after 60 minutes of inactivity, emits warning beeps for 10 minutes.
9. To turn the iron off, press and hold the OFF (LO) button for about 2 seconds. The iron will beep and then turn off.
10. After use, turn power off, unplug the cord and store in a safe location. Do not wind the cord around the styling iron – instead, use the attached cable tie. Allow plates to cool before storing. We recommend using both the heat-resistant cap and heat-resistant pouch when storing your Glampalm styling iron.

### Important Safety Instructions

Read all instructions carefully before using the product.

**DANGER:** When using any electrical appliance, basic safety precautions should always be followed. Be especially cautious if children are present. As with most electrical appliances, electrical parts are electrically live even when switched off.

- **HOT!** Do not touch heat plates. Keep eyes and bare skin away from hot surfaces.
- Only use the product for its intended purpose as described in this manual.
- The iron is designed to operate ONLY with standard electrical outlets: 100-240V at 50/60Hz
- The product should never be left unattended when plugged in. Never use while drowsy or sleeping.
- Do not use this appliance with a voltage converter or an extension cord.
- Do not clean this appliance with thinner, gasoline, or alcohol.
- Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or otherwise damaged, or if it has come into contact with water.
- If the cord is damaged, the manufacturer, authorized agent, or a similarly qualified party must replace it in order to avoid potential hazards.
- Keep the cord away from heated surfaces. Do not pull, twist, or wrap the cord around the appliance.
- Do not insert anything into openings or place objects onto the plates.
- Do not use outdoors, where aerosol (spray) products are being used, or where oxygen is being administered.
- Do not block air openings or place near flammable objects/surfaces while hot. Store on heatproof surfaces such as the provided heatproof storage pouch.
- Close supervision is necessary when the product is being operated by users under the age of 18, or by those with physical, sensory, or mental disabilities.
- Always unplug the iron immediately after use.

Children should be supervised to ensure that they do not play with the appliance.

**WARNING :** DO NOT USE THIS APPLIANCE NEAR BATHRUBS, SHOWERS, BASINS OR OTHER VESSELS CONTAINING WATER.

THIS MARKING INDICATES THAT THIS PRODUCT IS NOT TO BE DISPOSED OF WITH OTHER HOUSEHOLD WASTES. TO PREVENT POSSIBLE HARM TO THE ENVIRONMENT OR HUMAN HEALTH FROM UNCONTROLLED WASTE DISPOSAL, RECYCLE IT RESPONSIBLY TO PROMOTE THE SUSTAINABLE REUSE OF MATERIAL RESOURCES.

TO RETURN YOUR USED DEVICE, PLEASE USE THE RETURN AND TRANSACTION SYSTEMS OR CONTACT THE RETAILER WHERE THE PRODUCT WAS PURCHASED. THEY CAN TAKE THIS PRODUCT FOR ENVIRONMENTALLY SAFE RECYCLING.

**\*\* If the cord is damaged, it must be replaced by the manufacturer, its agent or similarly qualified person in order to avoid a hazard \*\***

### Product Registration and Warranty

- The Glampalm styling iron comes with a 2-year limited warranty that covers manufacturing defects in materials and workmanship. Glampalm warranty is effective only if you have a valid receipt and the product is still under the warranty period. The original serial number on the product must also still be intact.
- The warranty does not cover:
  - 1) damage due to misuse or abuse, such as dropping the styling iron or neglecting safety precautions and instructions;
  - 2) tampering, such as repair or attempted repair.
- Any implied warranties, obligations, or liabilities are limited to the two year duration of this limited warranty.
- Glampalm shall not be liable for special incidental or consequential damage arising from breach of the expressed or implied warranty.
- If you have a claim, please contact info@glampalm.com.au or the place of your purchase.
- We are not responsible for any products lost or damaged in transit.
